

## ST. CYRES TRANSITION GEOGRAPHY PROJECT

SHARE-Tag@CyresHumanities and @CyresTransition on Twitter

### TASK.

To construct a Paper Mache Globe.

This project is perfect for understanding the world in which we live in.

It is a little messy...but fun messy and well worth the investment!

### Materials.

Paper Mache Recipe

Newspaper

Mixing Bowl

### Paper Mache Recipe in a bowl.

This is virtually a runny glue using equal parts of flour and water. It dries a bit stiff but is great for sticking paper to any surface and is fun to work with, so get messy and start slopping!

### Method.

1. Add old newspaper sheets to the Paper Mache Recipe and construct a ball shape.
2. Add more sheets to the ball shape until it is about the size of a small football with a smooth outer layer.
3. When dry mark on the continents or use the attached sheets to cut out and stick in their correct places.
4. Add colour and label them and the Seas and Oceans of the World.
